

SF12CS-HD HIGH TEMPERATURE IMAGING SYSTEMS

HIGH-DEFINITION COLOR MONITORING
BOILERS - KILNS - FURNACES

The Syn-Fab SF12CS-HD represents state of the art in HD High-Temperature process monitoring. The improved design and optics coupled with HD cameras make the SF12CS-HD a must upgrade for process monitoring of kilns, boilers, and furnaces.

SYSTEM FEATURES

- HD Camera Core •Quick Change Design •Compact with Small Footprint •Low Volume Air Design •Modular Configuration •FOV Options •Network Ready

SYSTEM OPTIONS

- Complete Installation •Compliance for Hazardous Areas •Lens Length 12" to 72" •Obtuse (45°) and Right Angle (90°) View Lens •Portable Configuration

SF12C-HD BENEFITS

- Maximize Efficiency •Reduced Emissions •Safety of Plant Personnel
